PROFILE

Data & AI engineering student and apprentice in the Ipsos France CX Platform team. I help businesses grow by combining data, automation and clear design, and I make sure people actually use what I deliver.

WORK EXPERIENCE

Junior IT Platforms Project Manager (apprentice) | Ipsos, CX Platform team, Paris — Sep 2026 - Present

- Support the team running client experience (CX) programmes on Medallia, alongside my engineering degree.
- Completing Medallia onboarding training and building hands-on skills on the platform's core features.
- Documenting team processes to spot repetitive tasks and propose simple automations.

Data Analyst Intern (4 months) | CAD.42 Services, Rueil-Malmaison, France — Mar - Jun 2026

- Designed and deployed a real-time dashboard (Python/Dash, then migrated to Node.js) tracking **1,200+ sensors** across **100+ construction projects**, refreshed automatically via API.
- Built per-project health scores from battery-level analysis to anticipate sensor failures and prioritise field interventions.
- Wrote the technical documentation, **trained 5 colleagues** on the tool and supported the adoption of Claude (LLM) in the Operations department.

Data Analyst & Product Management Intern (2 months) | InspiraTec, Courbevoie, France — Jun - Aug 2025

- Contributed to requirements gathering for the MVP of a recruitment platform, including automated matching built with n8n.
- Automated data consolidation and the filtering of **50+ qualified offers and profiles per day** through web scraping.
- Centralised this data in a Power BI dashboard to support reporting and decision-making.

EDUCATION

Engineering Degree (Master's level) in Data & AI, apprenticeship track | ECE Paris — 2026 - 2029
BUT (Bachelor of Technology) in Data Science | Université Sorbonne Paris Nord — 2023 - 2026
International programmes: University of Zaragoza, Spain (2026) and International BusIT Week, UCLL, Belgium (2025).

PROJECTS

CaRental: logistics simulation and cost optimisation | Erasmus+, University of Zaragoza — 2026
Modelled a shuttle and rental-counter system in JaamSim with an international team of 4. Compared **100+ scenarios** in Python and found a configuration at €6.54 per customer while keeping at least 85% of customers satisfied. Presented the results in English.

6G patent acquisition | partner project with Thales — 2025
Built a patent scraping and automatic classification tool with an interactive Streamlit visualisation, in a team of 5.

Hupple Store | founder of an online store for digital products — Since Feb 2026
Automated order flows with webhooks and n8n and tracked KPIs in dashboards: **353 sales to 314 customers** so far.

SKILLS

Platforms & project work: Medallia (in training), requirements gathering, documentation, user training, process improvement, Agile/Scrum
Data & BI: Python (Pandas, NumPy, Scikit-learn), SQL, Power BI (Power Query), Dash, Streamlit, advanced Excel, KPI dashboards
Engineering: Node.js, PostgreSQL, MongoDB, Supabase, GCP, Docker, ETL, REST APIs, webhooks, Git
Automation & AI: n8n, web scraping, NLP, Machine Learning, prompt engineering, Claude

LANGUAGES AND INTERESTS

French: native | **English:** professional working level | **Interests:** volunteer mentor at AFEV (since 2024), fitness, music, technology
